

BUSINESS NETWORK FOR OFFSHORE WIND

OSW PORT & VESSEL SUMMIT

SEP 27-28, 2022
NORFOLK, VA

Building a robust and resilient infrastructure for the U.S. offshore wind industry.

Ports and vessels are the backbone of the U.S. offshore wind industry. Understanding the improvements needed for the nation's port infrastructure, as well as ensuring the availability and capacity of vessels, will be critical over the next decade as more turbines are installed in East coast waters. As the pipeline of projects continues to grow, the industry needs to come together to determine logistics to affordably and efficiently receive, transport, hold, and install turbine components.

Join the Business Network for Offshore Wind to discuss and learn about the many port and vessel business opportunities rapidly unfolding in the U.S. offshore wind energy industry.

Sponsorship Opportunities:

The OSW Port & Vessel Summit will bring together 200+ professionals in the port and vessels industries. The two-day Summit offers your business an opportunity to showcase your products and services directly to industry professionals with purchasing power. Contact Denielle Christensen (denielle@offshorewindus.org) to learn more.

Registration

- Network Members: \$495
- Non-members: \$595
